

EDX BV 30MA Multi-Angle Plate Bevelling Machine

The EDX BV 30MA Plate Bevelling Machine is a robust machine making it exceptionally easy to manoeuvre and convenient to use.

The BV 30MA is capable of full angular movement from 15° - 60° and the powerful 1100 watt high torque motor gives an extensive life span and quiet operation.

Features

- The powerful 1100 watt high torque AC induction motor offers long life and quiet running
- Utilises a 10 carbide insert tool holder with a full angular adjustment from 15° - 60°
- Compact and handy tool
- Robust for ease of movement and convenience in use

Technical Specification

MODEL	BV 30MA
Power watts	1100
Voltage V / Hz	110 / 60
No. load rpm	3600
Angle Adjustment mm	
- 60°	12.7
- 45°	16
- 37.5°	15.6
- 30°	14
- 15°	12
Length mm	475
Width mm	296
Height mm	247
Max chamber height @ 45° mm	10.6
Weight kg	19.3
