

Morgan Rushworth HSV 6100/20 CNC Hydraulic Variable Rake Guillotine Shear

Stock Code: M1036

The Morgan Rushworth HSV CNC range of variable rake guillotines are heavy duty, strong machines designed for a long working life. The CNC controller automatically calculates and adjusts the blade gap, the backgauge position, cutting angle and stroke length simultaneously once the data is entered. Therefore the strokes per minute cutting cycle is significantly increased. The cutting angle automatically adjusts according to material thickness minimising the twisting of sheet during the cutting cycle.
