

# TECHNICAL SPECIFICATION

## Morgan Rushworth HSR4-100 Hydraulic Section Bending Machine

The Morgan Rushworth HSR-4 is a revolution in section bending. This unique new 4 roll machine brings all the benefits of 4 roll plate bending to section bending. The finished product has significantly reduced flat end, compared to 3 roll machines, due to the double pinching process. The optional touch screen NC Control allows for greater repeatability and accuracy with the ability to save down configurations.

#### Features

- o Unique 4 Roll Design
- Ability to double pinch material ensuring minimal flat on end of bend
- o 2 rolls driven
- Hydraulic adjustment of lower pinch roll
- Hydraulic adjustment of two bending rolls
- o Hardened and ground high tensile roll shafts
- o Standard modular rolls suitable to bend a wide range of profiles
- o Induction hardened and ground rolls
- o Smooth rolls ensure minimum material marking
- o Manual lateral guide rolls with adjustment in one axis
- o Steel welded frame
- o Horizontal and vertical working positions
- o Mobile control panel

#### **Technical Specification**

MODEL	HSR4-100
Shaft Ø mm	100
Rolls Ø mm	320
Shaft length mm	200
Bending speed rpm	4.98
No of motorised rolls	2
No of side rolls axes	1
Motor kW	7.5
Length mm	2000
Width mm	1700
Height mm	1250
Weight kg	3000

### **Options**

- o 3 rolls driven
- o Manual lateral guide rolls with adjustment in one axis
- o 4-axis NC control unit; controls position of lower pinch roll, both bending rolls and the feeding of the material. Includes 100 program memories
