

TECHNICAL SPECIFICATION

Morgan Rushworth HSR-3 60/180 Hydraulic Section Bending Machine

The Morgan Rushworth HSR-3 range of hydraulic section bending machines are designed to roll various material sections and are available with shaft diameters from 50mm up to 120mm. All models have twin rams powering both of the lower rolls, providing pre bending capability and the convenience of performing the bending operation with the material in the horizontal position. All of the HSR-3 machines can be operated in either vertical or horizontal plain. The standard rolls supplied with the machine are hardened and have been designed to bend most sections, avoiding the cost of additional tooling. Lateral guide rolls ensure straight and true bending, or if required can be adjusted in order to spiral the material.

Features

- $\circ~$ All three rolls driven for excellent traction
- $\circ~$ Smooth rolls ensure minimum material marking
- Hardened rolls
- Moveable control panel
- $\circ~$ Digital read out indicating both back rolls position
- $\circ~$ Overload protection device
- $\circ~$ Hydraulically powered rotation
- $\circ~$ Hydraulically adjusted lateral guide rolls in 2 axis
- $\circ~$ Variable speed of rotation
